

Majorca

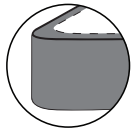

With the Majorca you will enjoy a 5 year period of cover for all components and covers defects in both materials and manufacturing.

POCKET SPRING

Our pocket springs move independently to avoid partner disturbance and to give a high level of back support.

EDGE SUPPORT

Some mattresses have that folding/sinking feeling when you lie near the edge...well we've placed firm pocket springs around the edge of the Majorca mattress to maximise the space you can use so your Queen feels like a Queen, not a Double!

PILLOW TOP

A pillow top gives you an extra layer of comfort and consists of several layers of foam and fibres. The pillow top doesn't have anything to do with the support level of your mattress so jump on and try before you buy to see how much you like the level of firmness with a pillow top!
